Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3728

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4 and 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In each claim, it is indefinite what the "inclined angle" is relative to.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 1-2, 9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Pozzoli (Figure 12)(5,743,390). Claims 1-9, 11 and 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Tempongko (Figure 6)(2003/0052022). Each discloses a disc storage box comprising a body (110; 60; respectively) provided with

substantially C-shaped support seats (120, 130; 62a, 62b), each seat including a plurality of support plates (outer peripheral portions shown; 42a and 42b) and a plurality of elastic positioning brackets (at 123 and 133; end portions at 56 and 59).

As to claim 2, each discloses the seats overlap.

As to claims 3 and 5, Tempongko discloses an oblique shape to the C-shaped support seats, as much as described by the claim.

As to claims 4 and 6-7, Tempongko discloses the support seats having an inclined angle (see Figure 4 as it relates to Figure 6), with one upper seat (62b) at a greater angle by lying atop the other seat.

As to claim 8, Tempongko discloses a support seat (Figure 4) having a height greater than the side frame(38b), the same holding true for two seats as in Figure 6.

As to claims 9 and 11, each discloses arc-shaped seats.

As to claims 13 and 14, Tempongko discloses arc-shaped elastic locking blocks (56 and/or 59).

As to claim 15, Tempongko clearly shows elastic clips in Figure 6.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 10, 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tempongko in view of Uchida (6,685,015). Uchida discloses a support seat provided with L-shaped positioning brackets (9). To modify the support seats of Tempongko employing the L-shaped positioning brackets of Uchida would have been obvious in order to better secure a disc to the support seat, as suggested by Uchida.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are storage boxes with analogous support seats.
